Instructions:

To fill out the match play log:

The captain, date, and level fields must be manually filled for home and visiting teams

How to fill player names and resort boxes:

1) to fill line 3 - simply select the empty box and a little arrow on the right appears. Click on that arrow and a list of resorts appears. Select the one for that box

2) to fill player lines - use the roster tab at the bottom of this page. First - you must have the correct roster loaded in this range of cells. Click on this tab for explanation

3) once the correct roster lists are in the correct columns - come back to this page and select your players

4) place the cursor in the home (or visiting) player cell and click on it. A small box will appear on the right of that cell with an arrow

5) Click on this arrow and a drop down box opens to show the list of players

6) If the list looks blank scroll up or down to see the names and select the appropriate one

When round numbers are filled the color will show green for first and yellow for second round.

Colors are based on lowest number = green
